EXCEPTIONALLY HANDMADE

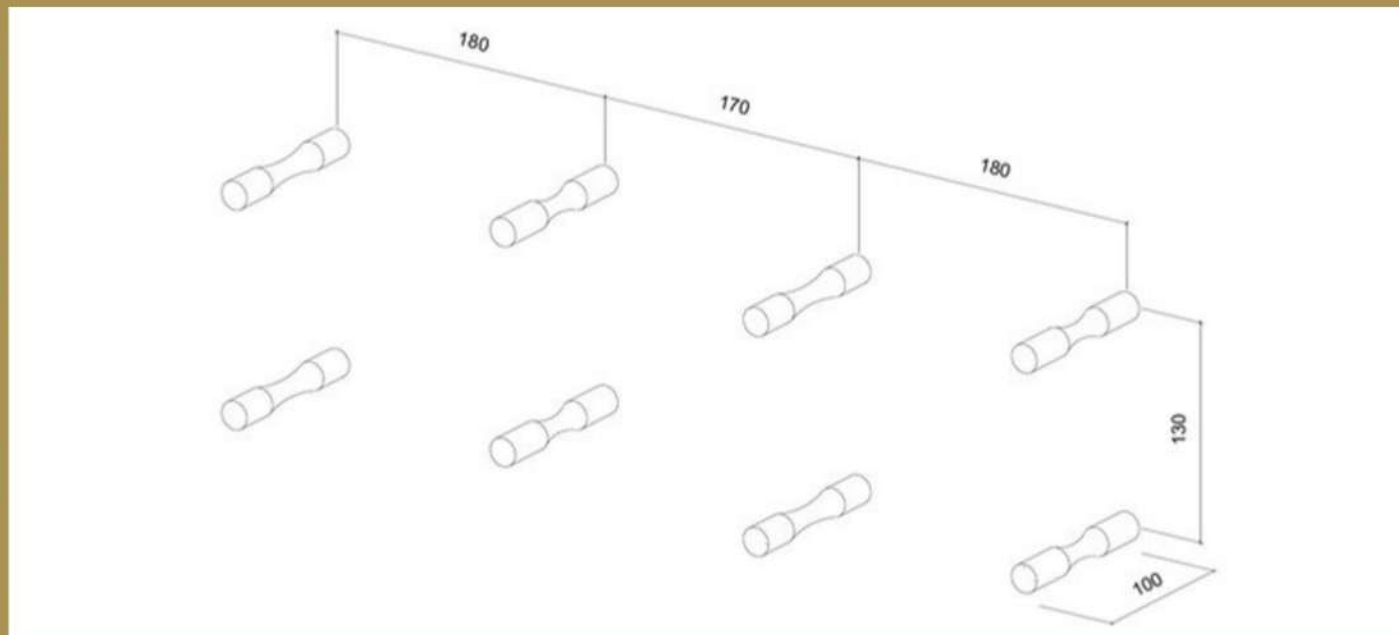

DISPLAY PINS

The Display Pins are sold as a set and feature one base pin and one neck pin.

Sets are available for 1, 2 or 3 bottles deep/behind each other.

Pins must be fixed through a board - not directly into the wall.

A sleek label facing display.

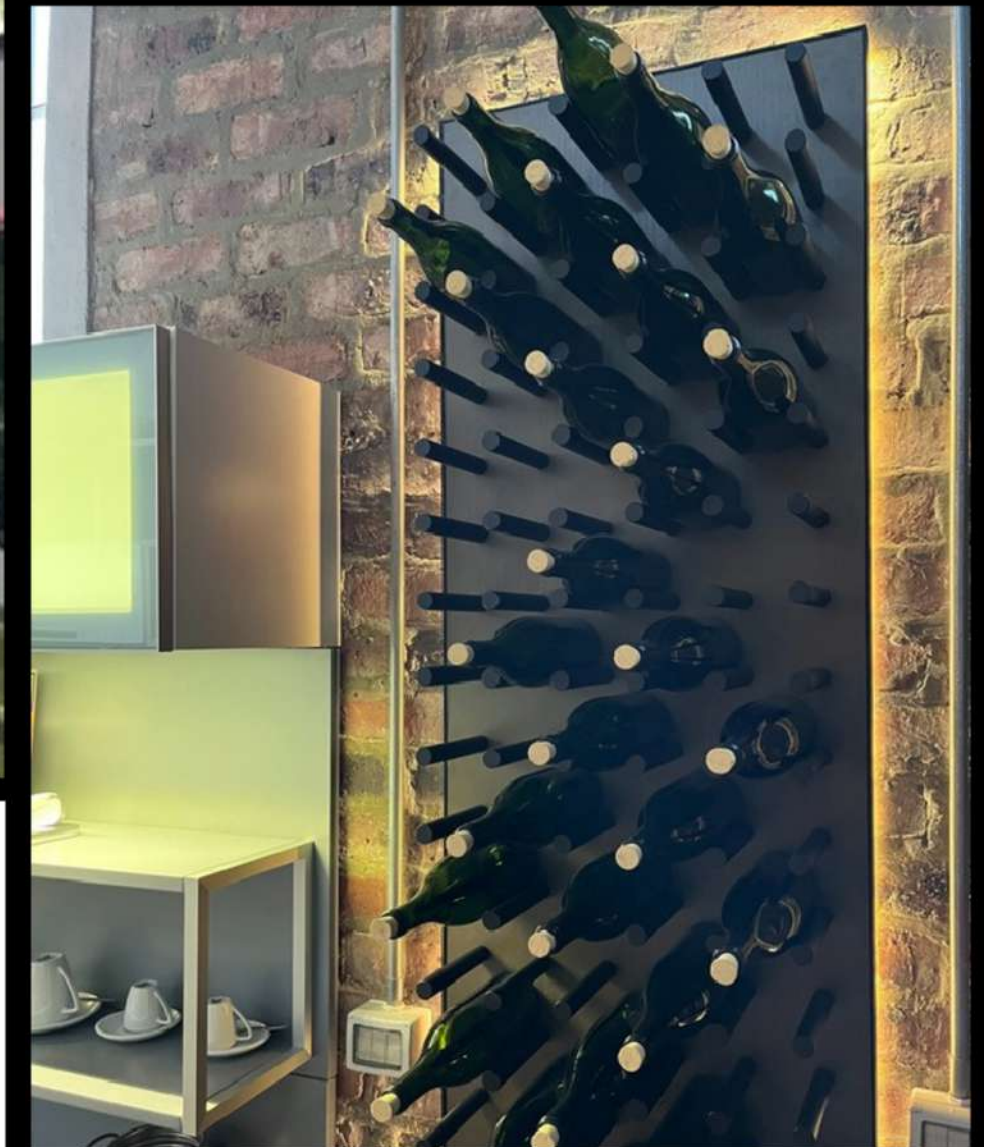

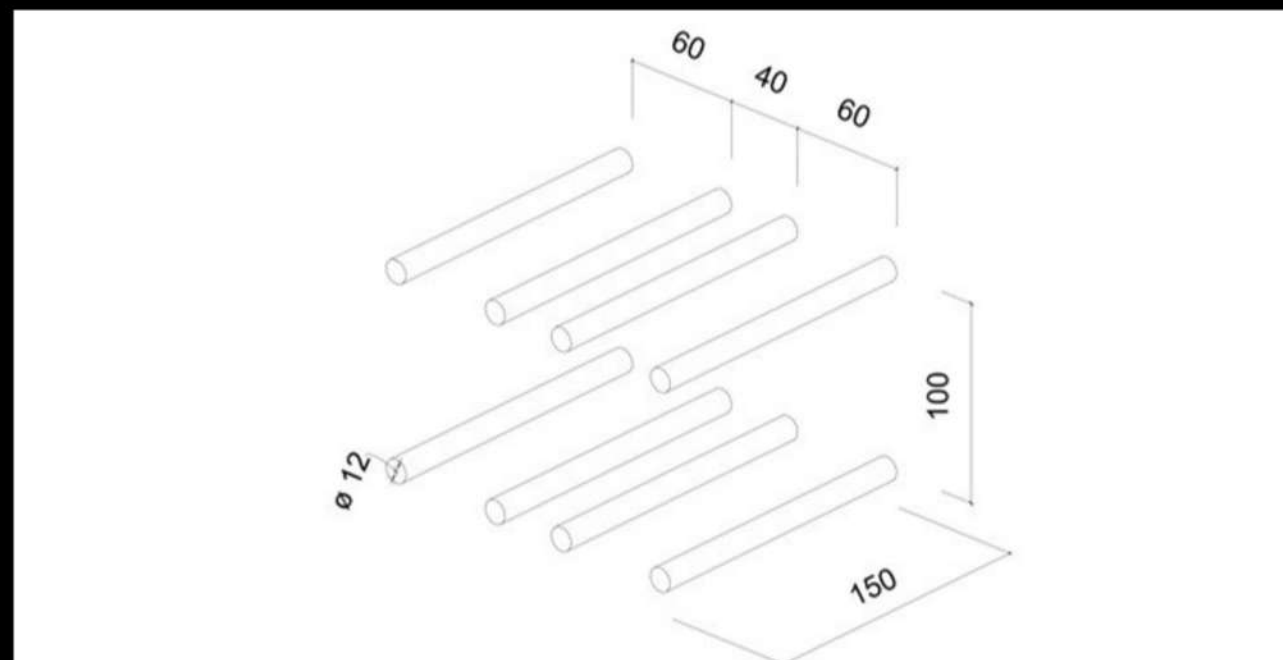

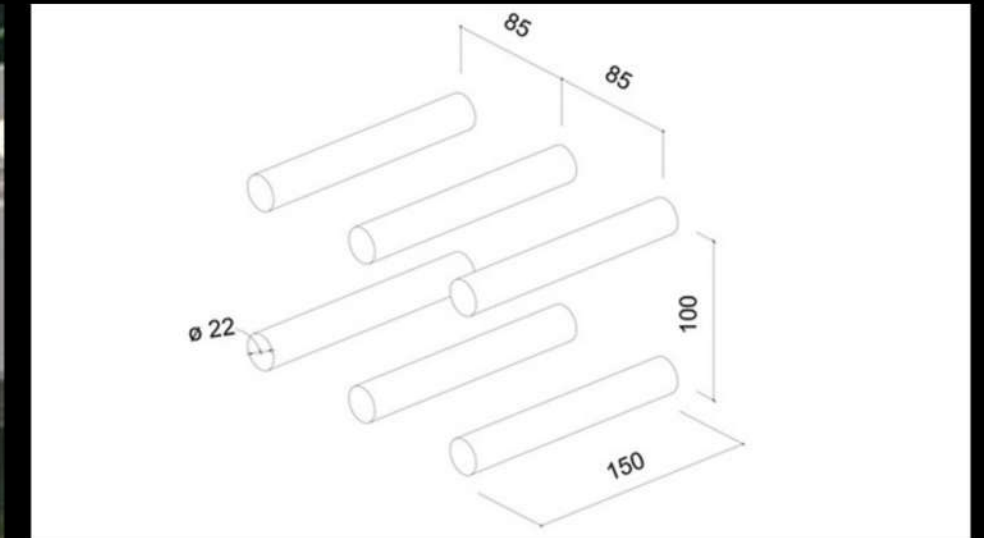

ROUND WINE PINS

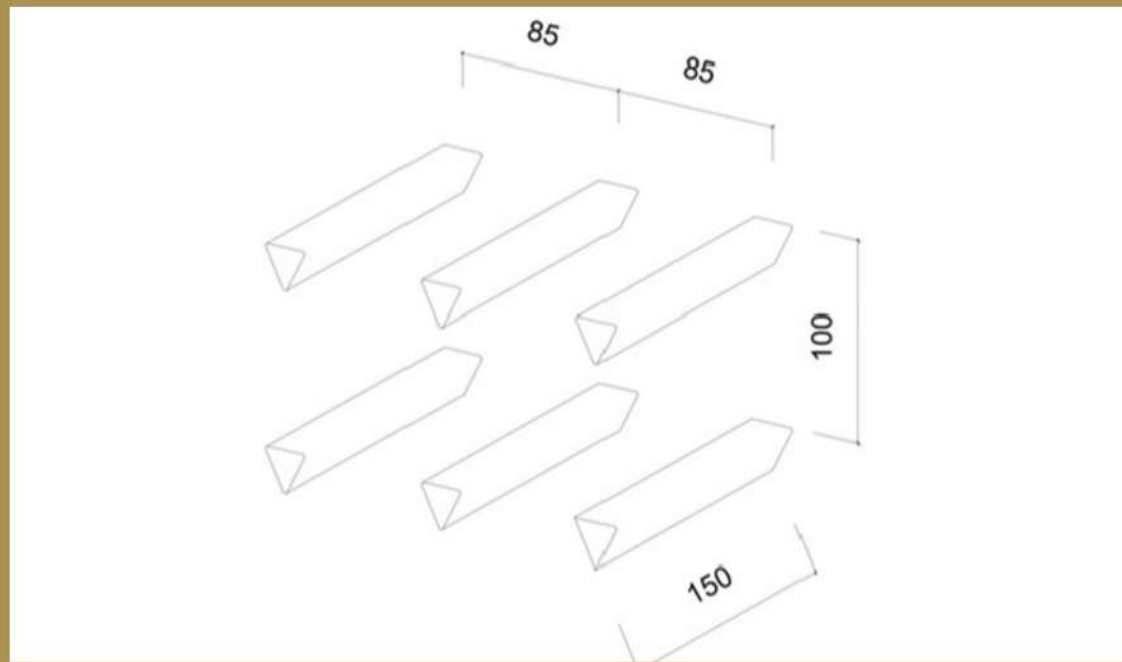

The Round Pins are available in

- 22mm solid aluminium Round Pin - shared central pin i.e. 3 pins to hold 2 bottles.
- 12mm solid aluminium Round Pin which requires 2 pins for every bottle stored.

Pins must be fixed through a board, not directly into the wall.

Effortless cork-facing display for maximum storage capacity.

V-PINS

The top of the V-Pin is flat, with the point facing downward, allowing bottles to be spaced apart better and to accommodate a wider variety of sizes. The V-Pins make use of a shared central pin i.e. 3 pins to hold 2 bottles.

V-Pins must be fixed through a board, not directly into the wall.

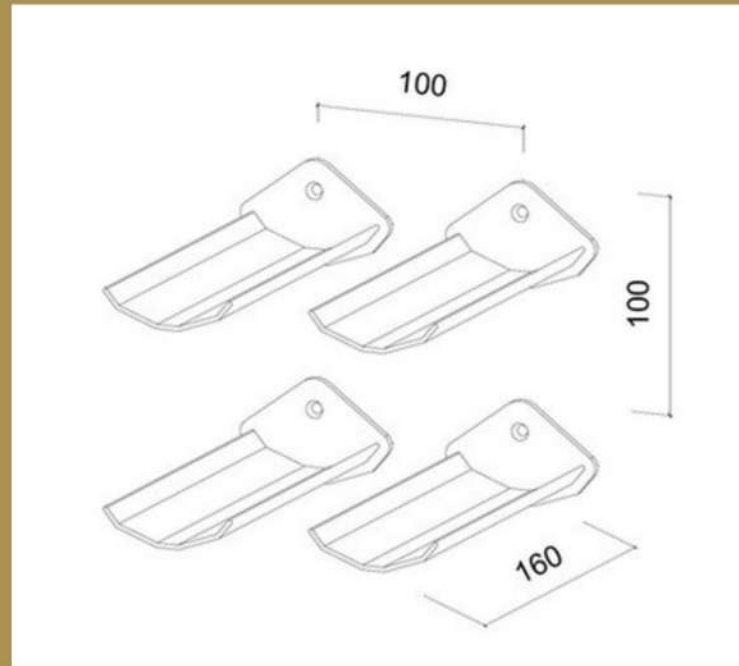

An effective cork facing display for maximum storage capacity.

SOLO PINS

The SOLO Pins have been designed to create an impressive floating bottle effect without seeing any racking.

Each SOLO Pin holds 1 bottle and can be attached directly to the brick or concrete wall, timber panel or kitchen cupboards.

These pins can be placed tightly together for maximum storage capacity, or far apart for greater space in between each bottle - depending on the design and space requirements.

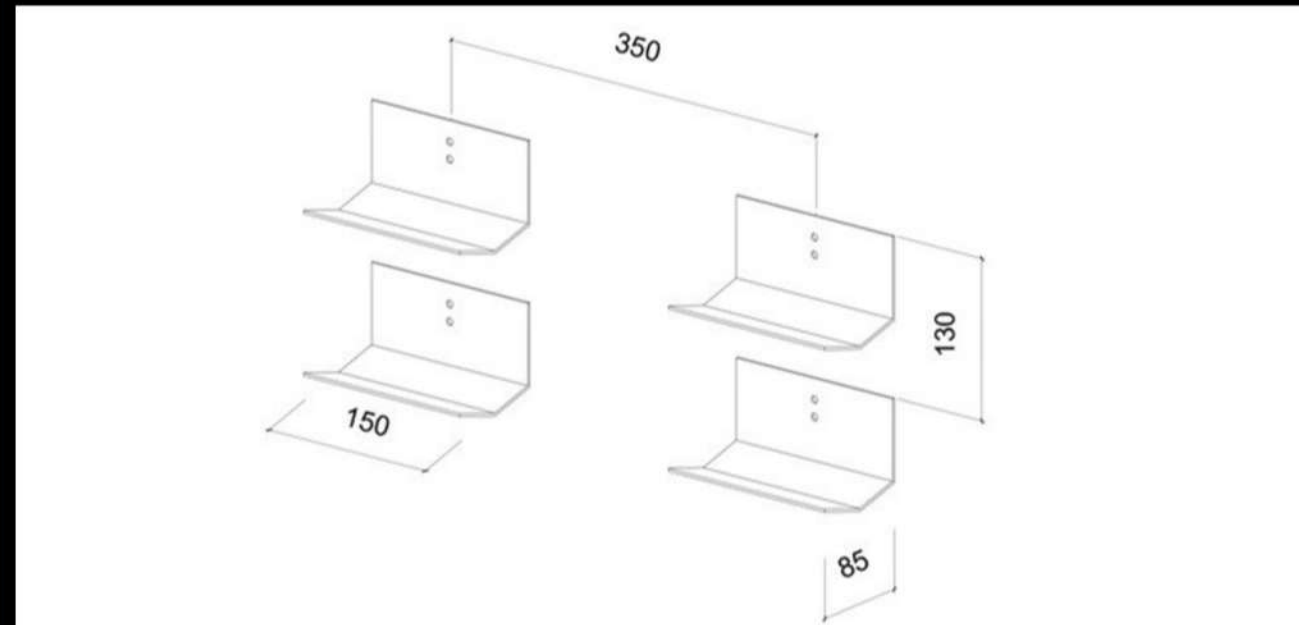

WINE CRADLE

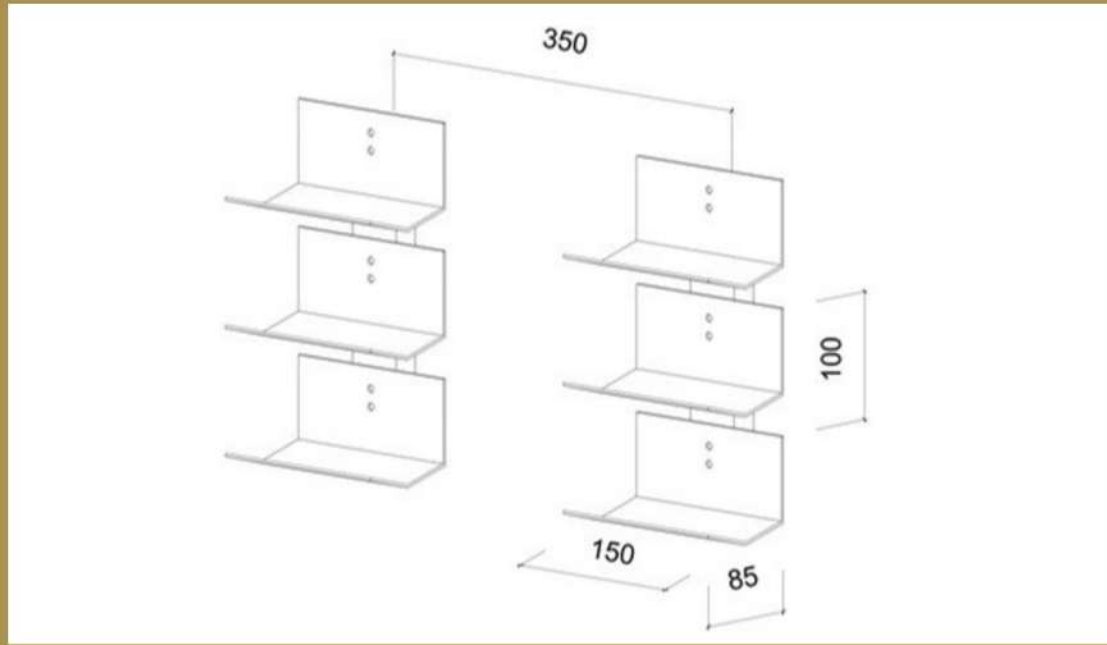

-LOOSE-

The Wine Cradle is our most popular wine racking item allowing for many creative ways of displaying the wine collection.

Front fixed directly into the wall or timber panel.

These Wine Cradles allow for an eye-catching label-facing display of hidden racking.

WINE CRADLE

- ON A SPINE -

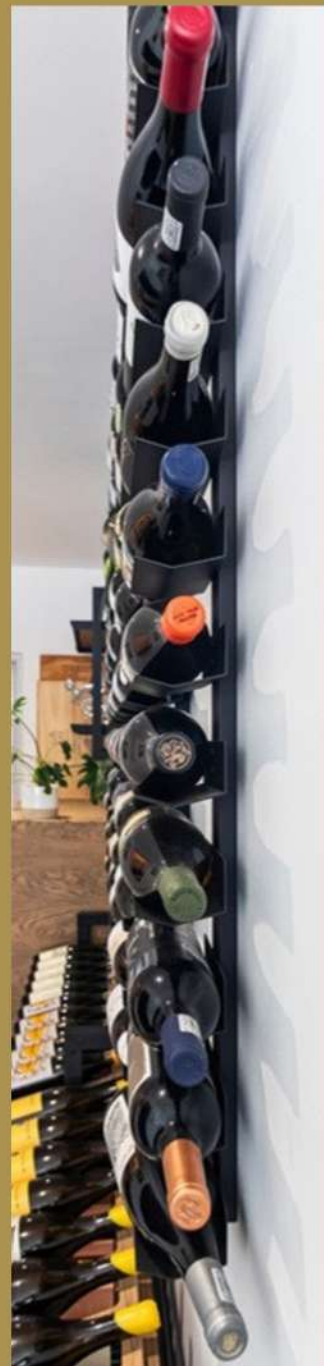

The Wine Cradle is our most popular wine racking item - on a spine or loose.

We fit these Wine Cradles to a 45mm x 16mm black aluminium spine for convenient and fast installation.

Front fixed directly into the wall or timber panel.

Sold as 700mm units that connect together to make 1400mm and 2100mm spines, depending on the space.

A neat label-facing storage option.

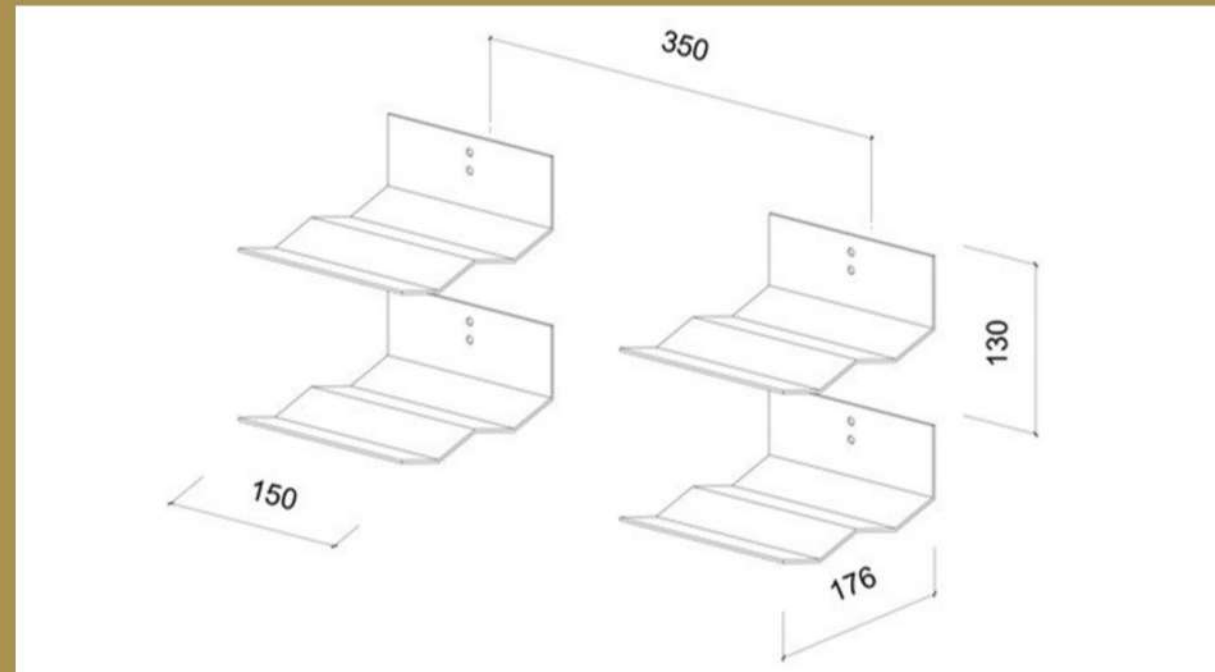

WINE CRADLE MAX -LOOSE-

The Wine Cradle MAX is very popular providing double capacity, label-facing hidden racking display.

Holding 2 bottles behind each other, the Wine Cradle MAX allows you to double up on your storage in any given space (compared to the single Wine Cradle).

Front fixed directly into the wall or timber panel.

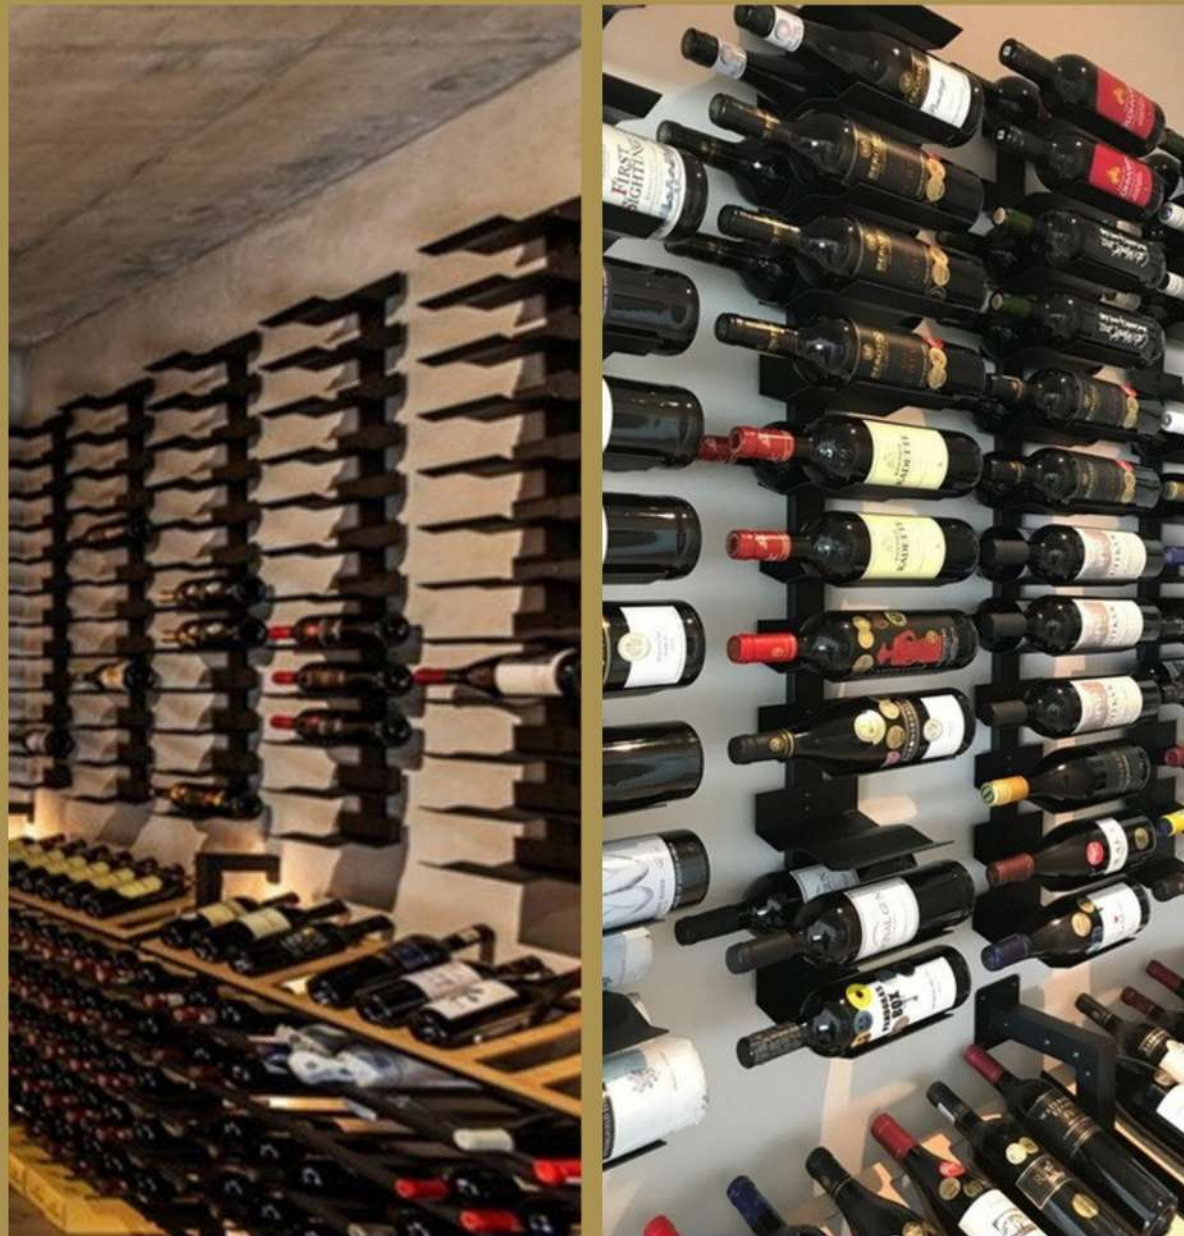

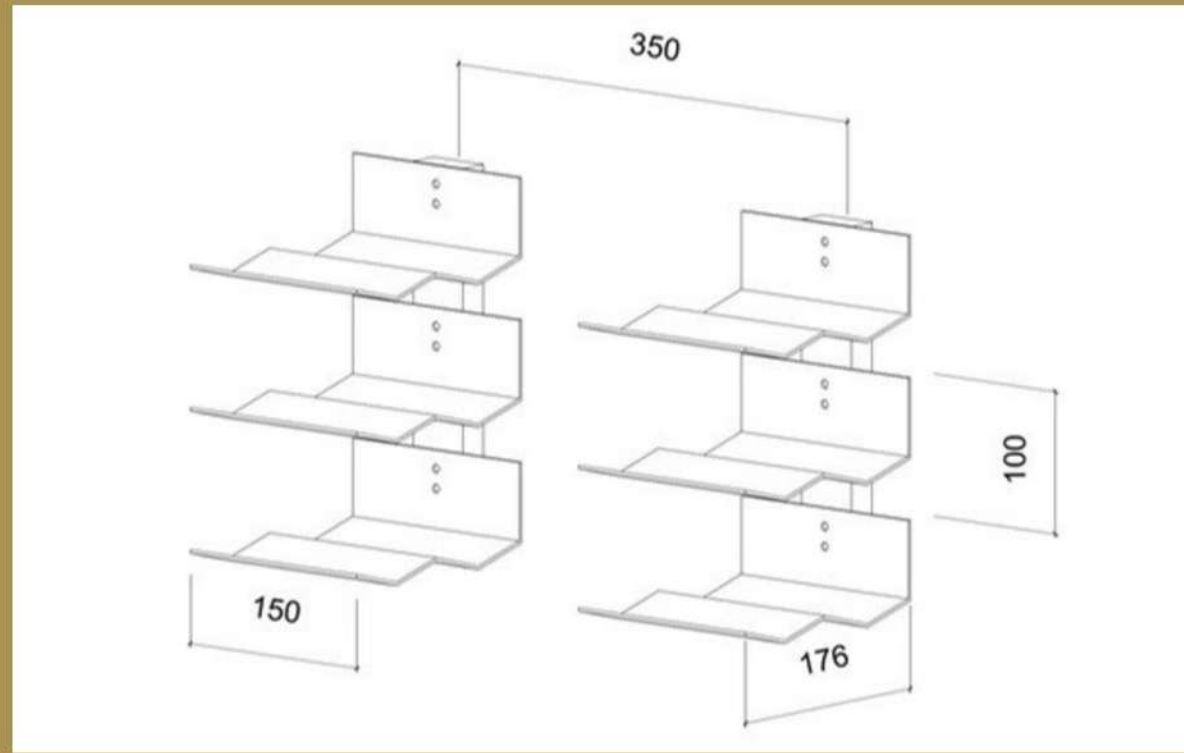

WINE CRADLE MAX -ON A SPINE-

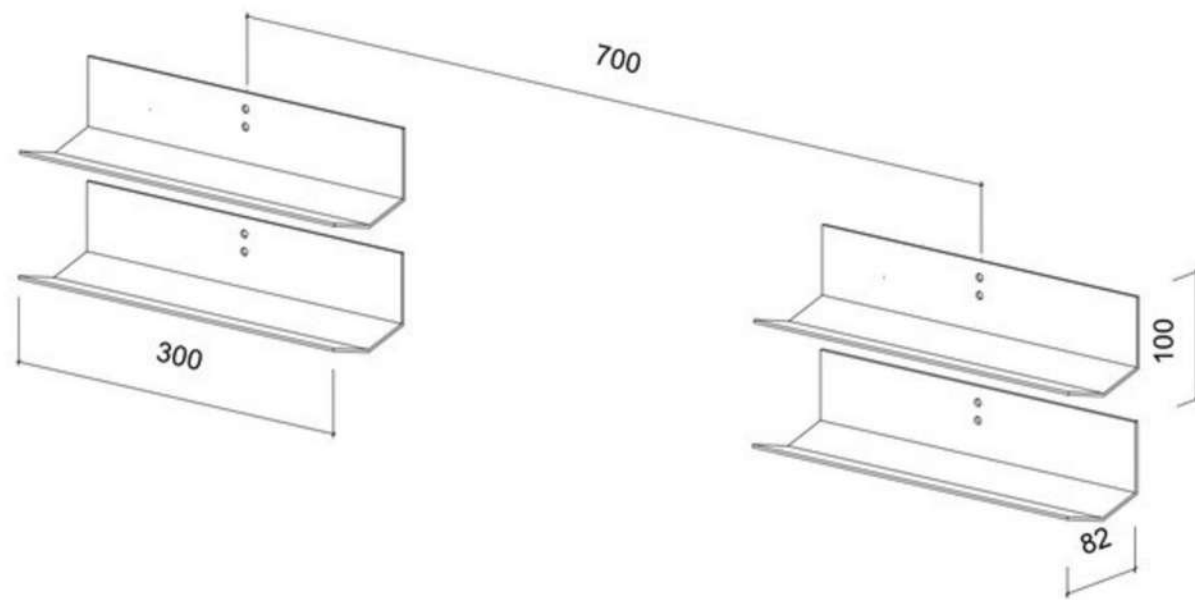

Being very similar to the Wine Cradle, the Wine Cradle MAX is a must-have for doubling the bottle capacity in any given space.

We fit the Wine Cradle MAX to a 45mm x 16mm black aluminium spine for convenient and fast installation.

Front fixed directly into the wall or timber panel.

Sold as 700mm units that can connect together to make 1400mm and 2100mm spines.

WINE CRADLE BASE2BASE -LOOSE-

The Wine Cradle Base2Base is an extension of the regular Wine Cradle, allowing 2 bottles to sit on 1 cradle with the bottle bases touching in the centre and necks facing outwards.

Fixed directly into the wall or on a timber panel.

An elegant label-facing, hidden racking display.

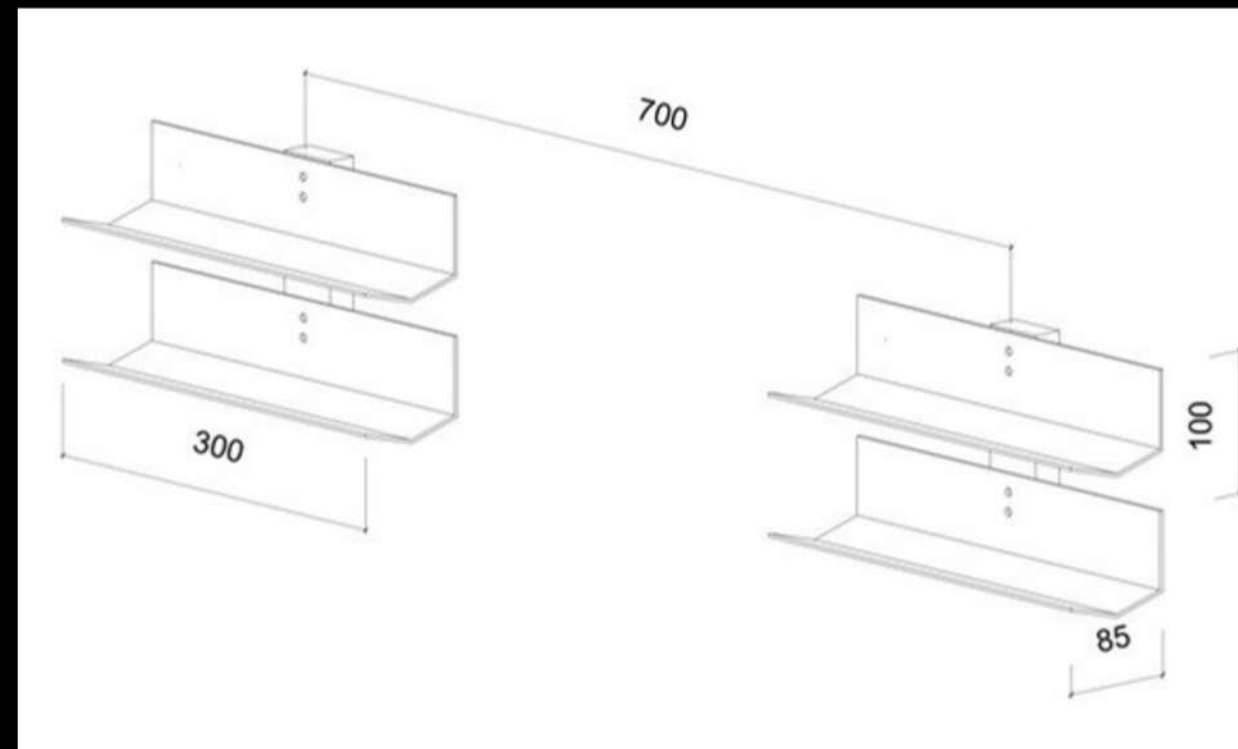

WINE CRADLE BASE2BASE -ON A SPINE-

Being an extension of the regular Wine Cradle, this rack allows 2 bottles to sit on 1 cradle with the bottle bases touching in the centre and necks facing outwards.

On the Spine means we fit these Base2Base cradles on a 45mm x 16mm black aluminium spine. Sold as 700mm units that can connect to make 1400mm and 2100mm spines.

Front fixed directly into the wall or on a timber panel.

Sleek label-facing display.

G*GRASS¹⁰

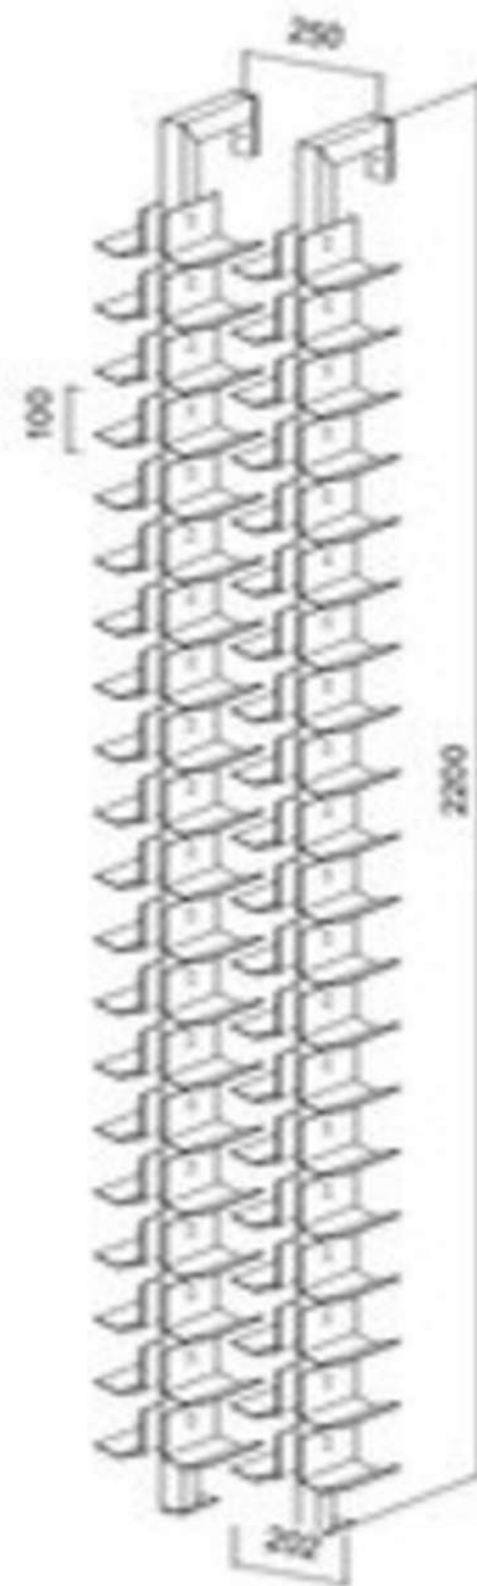

DOUBLE-SIDED WINE CRADLE

The Double-Sided Wine Cradles have remained a favourite in our wine racking collection. This option gives great storage capacity for the available space, creating a vertical storage design with floating bottles.

Available in 'floor to ceiling' units, allowing them to be positioned in front of glass panels or centrally within a wine room.

Alternatively available in 'floor to wall' units - perfect for those awkward areas under staircases where you need to follow the angle from low to high.

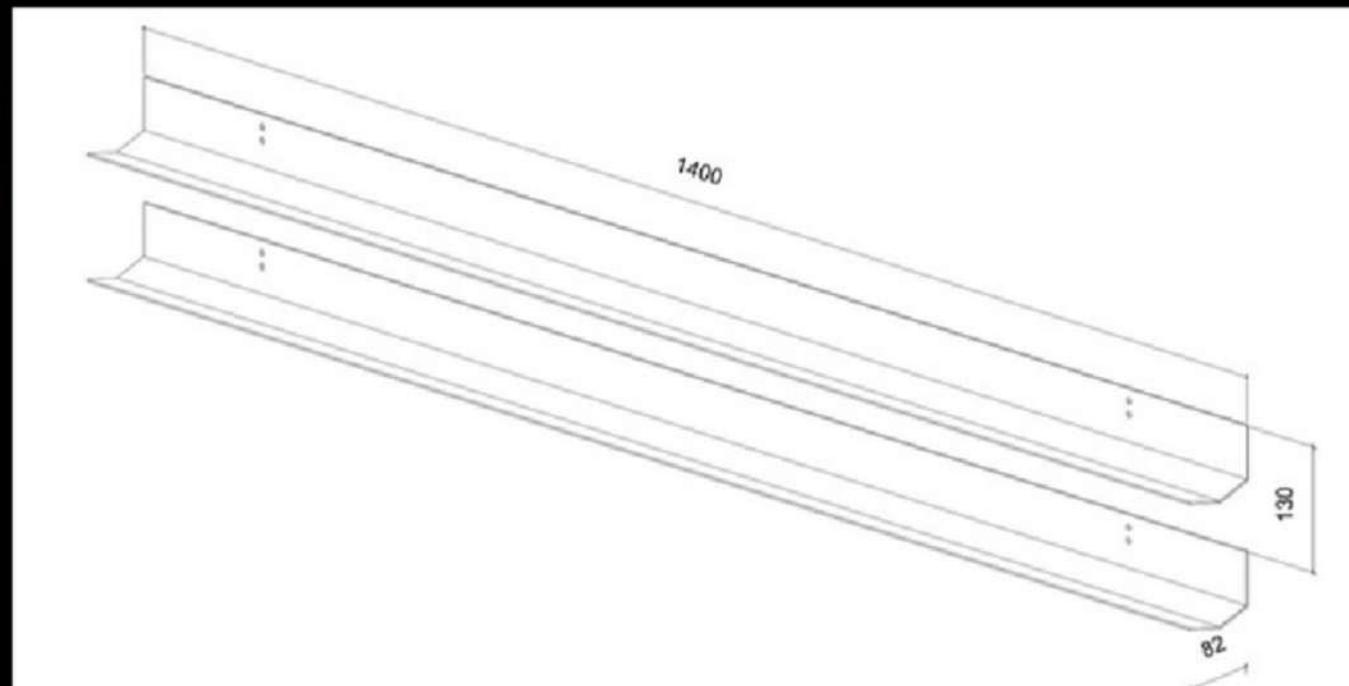

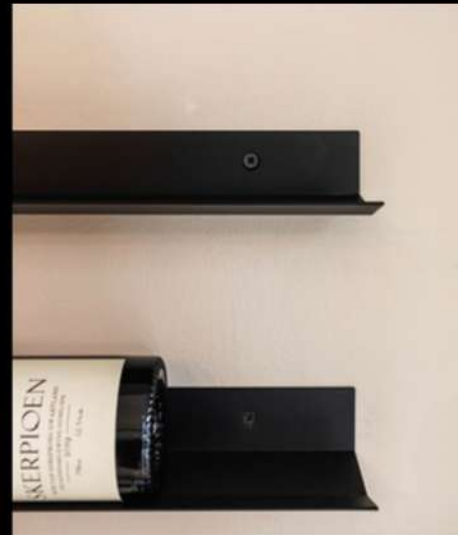

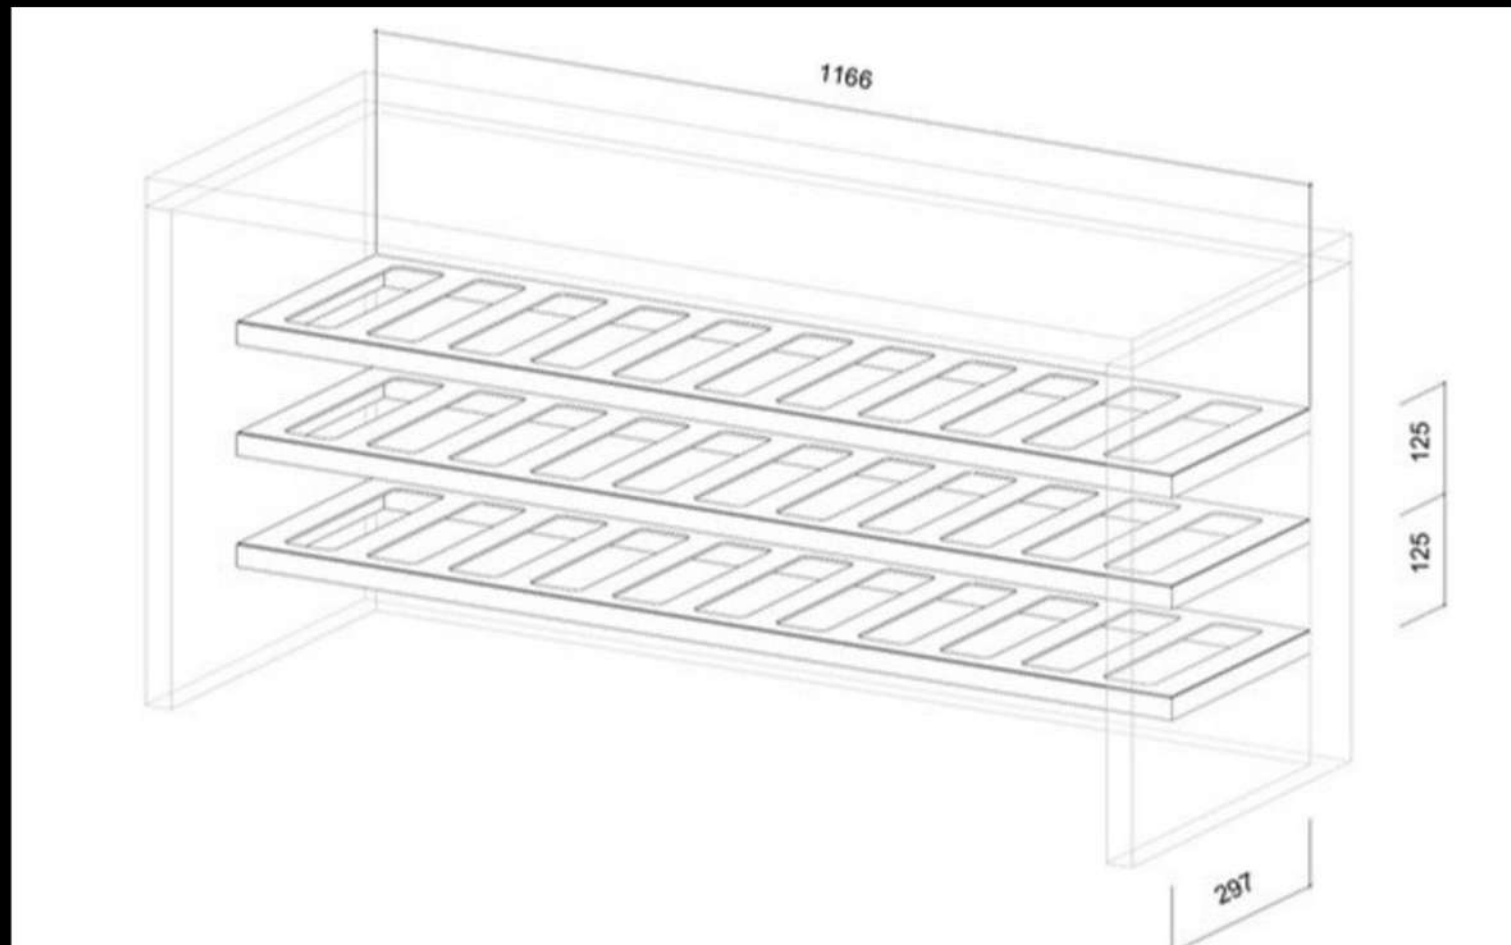

WINE BAR

The Wine Bar is a longer length Wine Cradle, which gives a clean horizontal wine bottle layout, compared to the Wine Cradles on Spines.

These Wine Bars are pre-drilled for easy installation and are available in lengths of 1400mm long (4 bottles) and 2100mm long (6 bottles).

Key feature: horizontal label facing display.

WINE SHELF

The Wine Shelf is the perfect 'in cupboard' solution for wine bottle storage, replacing the outdated pigeon hole effect.

Available in standard and custom sizes, the shelf is easy to install with fixing points on the shelf sides.

Available in matt black powder coated laser cut aluminium inlay.

1.

1.

From bottom to top (as an example):

- Cork facing Wine Shelves
- Angled Wine Shelves
- Wine Cradles

WINE WALL IDEAS

2.

WINE GLASS HOLDER

A stylish and practical addition to any bar unit or kitchen, this wine glass holder is designed for easy installation under shelves or cupboards.

It features a front-to-rear entry for convenient access and comes in a standard 300mm length, accommodating three glasses with a maximum base width of 93mm.

Made from black powder-coated aluminium, it offers durability and a sleek finish. The holder is secured with two screw holes for stable mounting.

Custom lengths and colours are available on request.

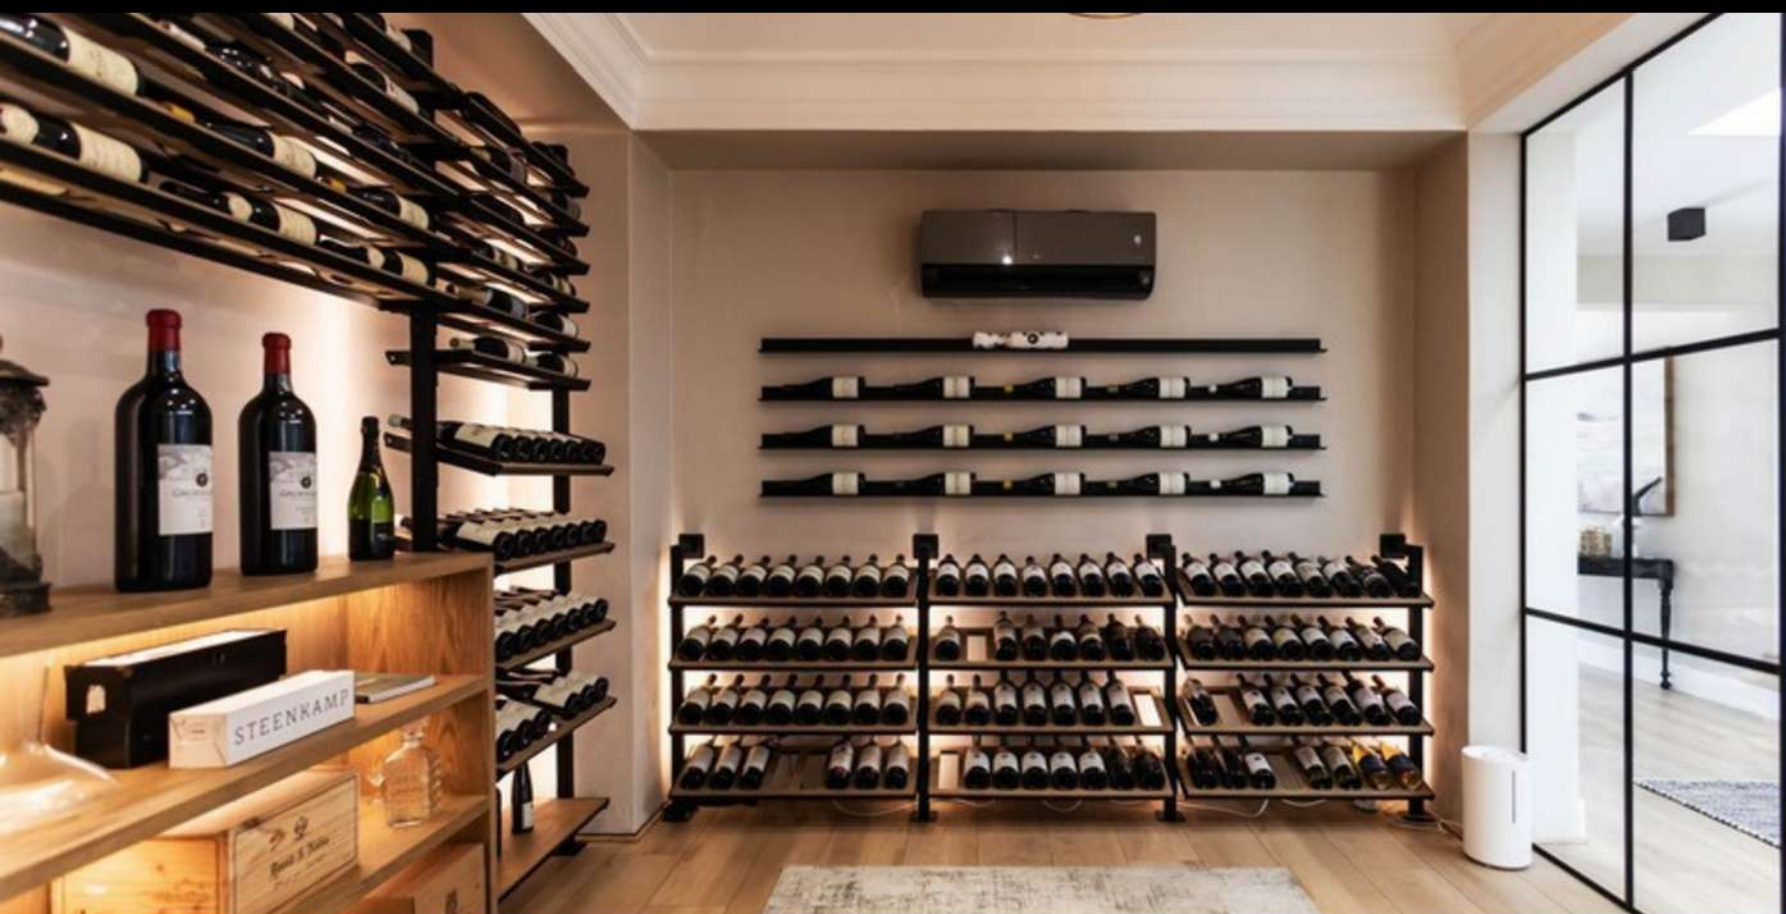

We are ready to assist you with
options to best suite your clients'
particular space...
