MOVEMENT SYSTEMS, FITTINGS AND ACCESSORIES

We operate all over the world, wherever our customers call home. Because customer proximity is an expression of our corporate culture.

Developing complex movement systems takes an efficient team combined with the passion and desire to work together and transform ideas into something new. This is our traditional way of thinking at GRASS. **Movement is our passion.**

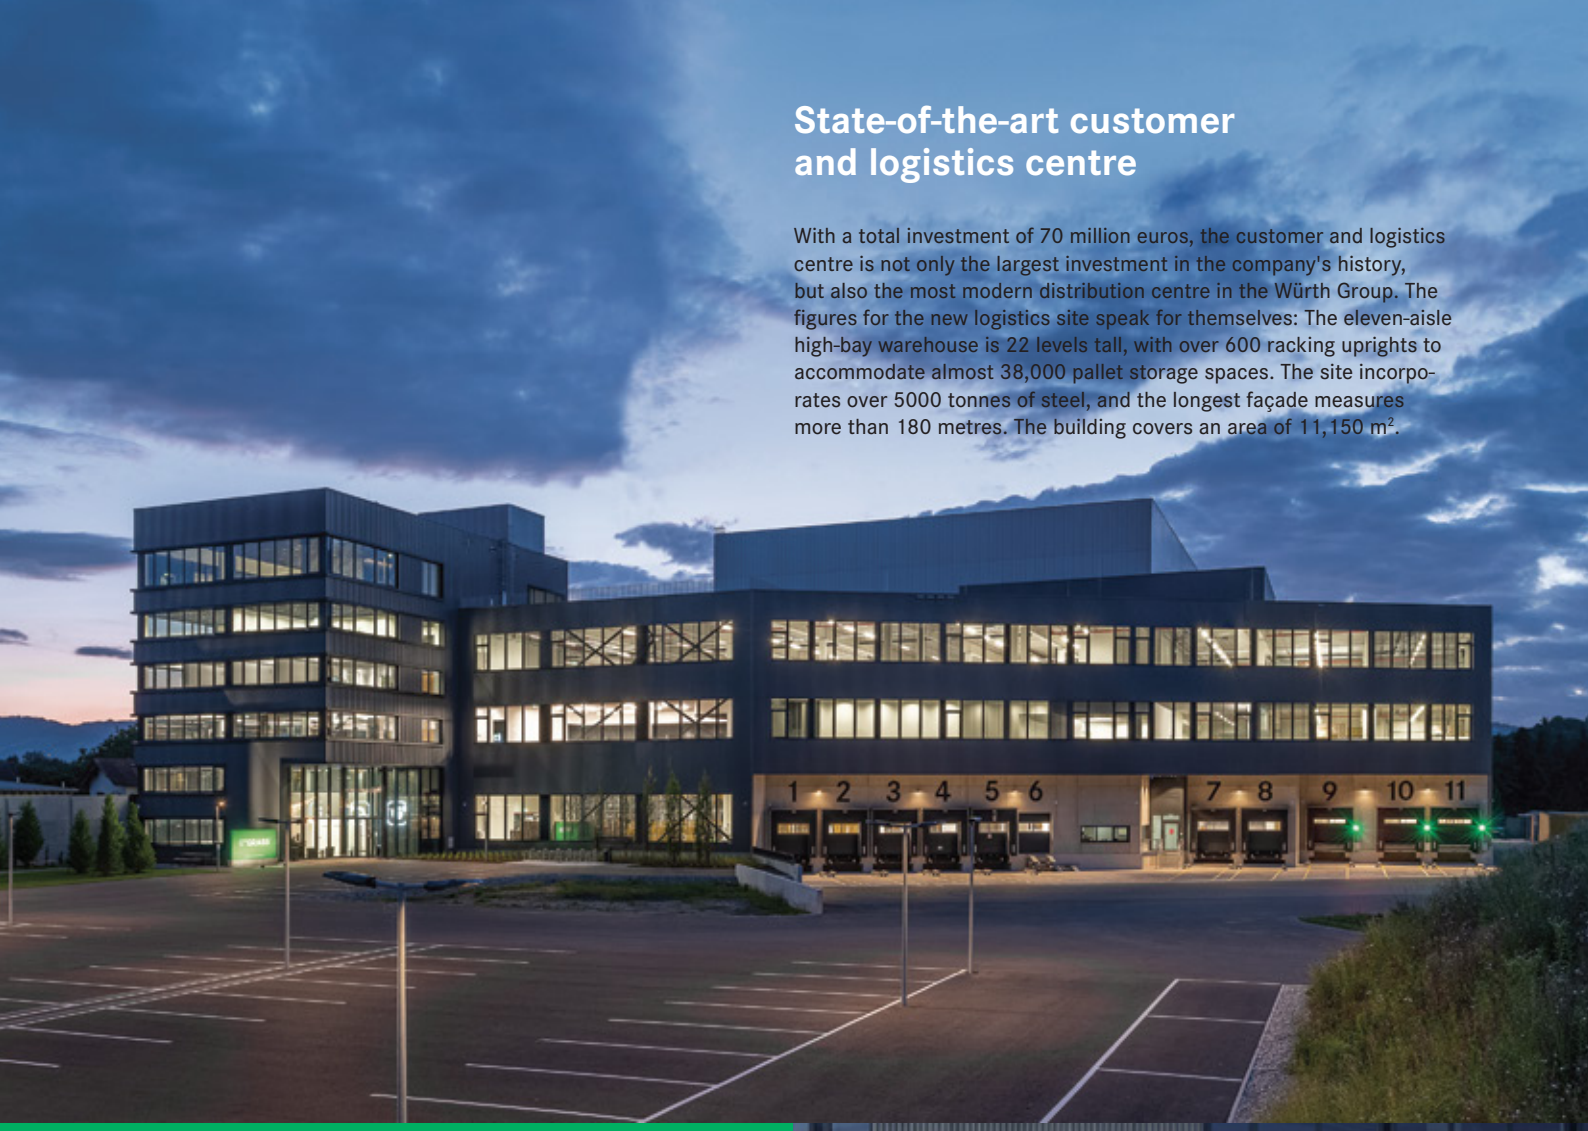

The GRASS Group is a globally successful corporate group, a traditional yet fresh brand with an impressive variety of perspectives. With around 1860 employees across 19 locations and more than 200 sales partners in 60 countries, GRASS ranks among the world's leading specialists in movement systems.

State-of-the-art customer and logistics centre

With a total investment of 70 million euros, the customer and logistics centre is not only the largest investment in the company's history, but also the most modern distribution centre in the Würth Group. The figures for the new logistics site speak for themselves: The eleven-aisle high-bay warehouse is 22 levels tall, with over 600 racking uprights to accommodate almost 38,000 pallet storage spaces. The site incorporates over 5000 tonnes of steel, and the longest façade measures more than 180 metres. The building covers an area of 11,150 m².

New hybrid picking system ensures optimum loading and unloading.

A custom warehouse management system has been developed for GRASS, featuring a material flow computer, forklift control system and mobile device integration. This system operates independently in the incoming goods area: when trucks dock, the fully automatic system accepts the pallets via a state-of-the-art floor conveyor without human intervention. A truck can be completely unloaded in just two minutes with this process. For outgoing goods, orders are presequenced using two separate, double-deep shipping buffers. Items for an order are removed "heavy before light" in order to optimise loading onto the truck.

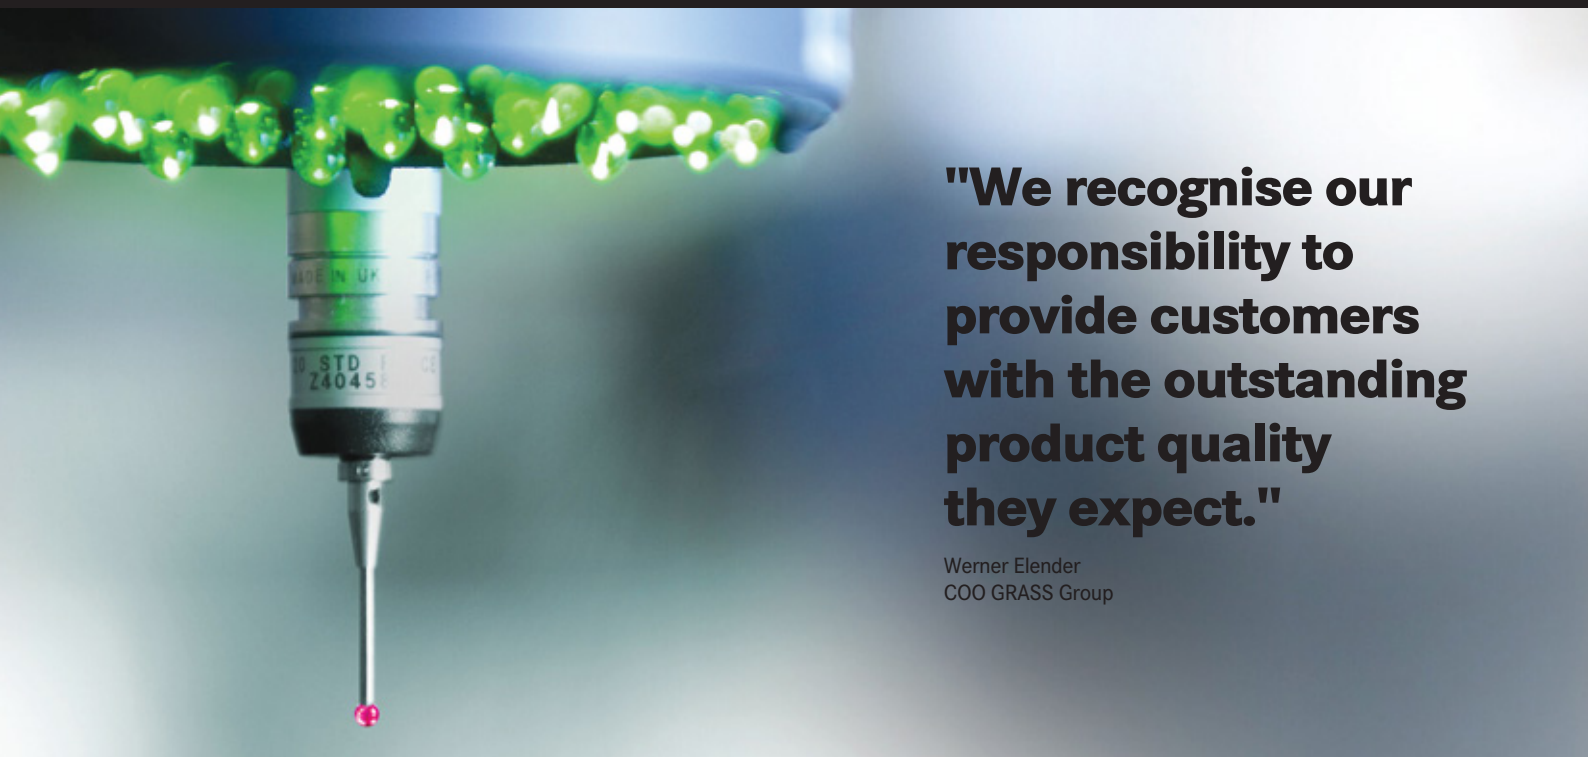

Since 2004, GRASS has been part of the international Würth Group, which has an annual turnover of more than 20 billion euros and is the world leader in the trade of assembly and fastening materials.

MEMBER OF THE WÜRTH GROUP

QUALITY@GRASS

Quality begins with development.

Ideas can only become innovations if they can be produced in series at the highest level. Our engineers rely on all the benefits of modern development and production technology to manufacture these product ideas. Production and development departments work closely together across locations to guarantee the continuous optimisation of all production processes.

"We recognise our responsibility to provide customers with the outstanding product quality they expect."

Werner Elender
COO GRASS Group

QUALITY@GRASS

Technical precision, durability, functionality, design and environmental consciousness all come together to form a highly sophisticated quality standard.

For us, quality means ensuring that each movement system always meets the same reliable standards, so that each individual system fulfils the high demands. That's why only one thing counts for our experienced teams when it comes to quality: To ensure that GRASS products continue setting the standard in future through their quality and excellence across the board when it comes to technology, design, reliability and longevity.

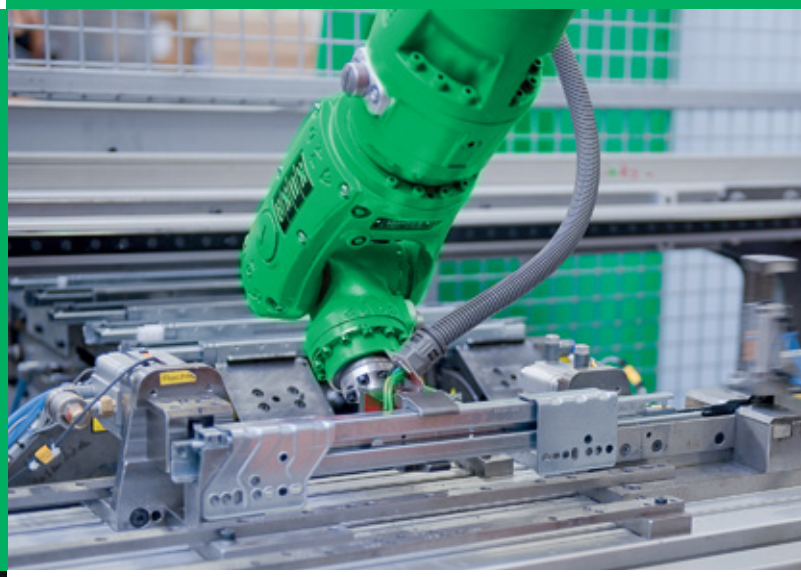

The packaging plant at the Götzis site uses two separately controlled robotic arms to process around 110 different packaging variants. With a cycle rate of just six seconds per slide set, the system's performance range ensures high efficiency – whether handling single boxes or outer packaging.

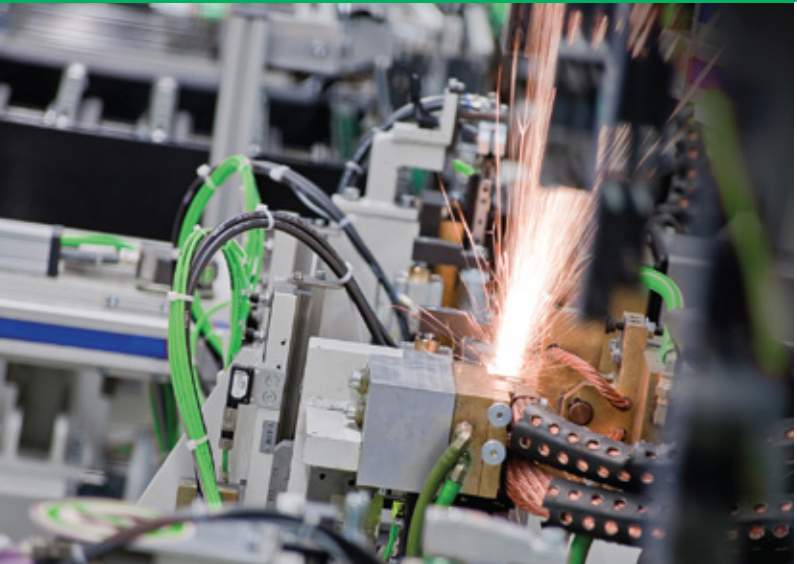

Exceptional products call for state-of-the-art production and testing facilities.

State-of-the-art machinery helps our highly qualified employees to create outstanding products. This includes state-of-the-art production lines, cutting-edge welding robots and automatic punching machines which, with a pressing force of several tonnes, can form the thickest sheet metal and feed the parts directly into the automatic assembly line without any further post-processing. Numerous testing and control stations integrated into the production lines use SPC (Statistical Process Control) to monitor consistent quality excellence, which forms the basis for a high level of customer satisfaction.

For us, development and production are seamlessly integrated. It is this belief that helps us transform ideas into new products.

Ideas can only become innovations if they can be produced in series at the highest level. Our engineers rely on all the benefits of modern development and production technology to manufacture these product ideas. Production and development departments work closely together across locations to guarantee the continuous optimisation of all production processes. After all, GRASS products are a promise that must be kept day after day.

We produce tens of thousands of movement systems in our plants every day. To ensure that these systems meet our high quality management requirements, each product line is thoroughly tested on site. Our high internal standards, test procedures based on DIN and LGA and testing by independent institutes ensure systematic quality assurance.

Because we live and work in one of the most beautiful regions in the world, we share a responsibility to conserve natural resources.

Green power: In-house combined heat and power plant in Höchst.

With an output of 2000 kWh, the combined heat and power plant covers 75% of our electrical energy requirement. The waste heat can then be used to heat the premises or, in summer, to provide a substantial proportion of the cooling capacity via the absorption refrigerator.

GRASS drawer systems are almost 100% recyclable and do not contain any hazardous substances or substances specified in the REACH regulation*.

We see the present as part of the future.

Active involvement in environmental protection is an important prerequisite for long-term company success. Working with this mindset means conserving resources and creating ecologically sound production conditions. We have high expectations of ourselves, and our efforts to keep our ecological footprint as low as possible require a continuous improvement process that incorporates all areas of the company.

GRASS Sustainability Commitment

* Substances of very high concern on the candidate list for approval in the EU.

For GRASS, environmental protection is a fundamental corporate objective. Taking personal responsibility is part of our identity.

Since 2010, the GRASS Group's international environmental management system has been certified according to ISO 14001. GRASS's strong environmental commitment and dedicated projects dating back many years are entirely rooted in **our love of nature.**

CO2 savings: 640 tonnes per year.

Extensive energy efficiency measures have significantly reduced our CO_2 emissions.

Recycling of steel waste. 6650 tonnes per year.

100% of steel waste generated during production is recycled.

Heat requirements reduced through heat recovery.

Compressor and exhaust gas heat exchange systems with a total output of over 3000 kW also improve our carbon footprint.

Energy savings: 18% reduction in power consumption.

Reduction in overall electricity demand from 62 million kWh to 51 million kWh per year in the last 5 years.

40% waste reduction: 640 tonnes per year.

The volume of non-recyclable waste has been reduced from 1530 tonnes to 905 tonnes per year.

L&S Lighting Intelligence

Moove 2

FREE CUT

Precision light. Perfectly placed.

A cuttable, recessed LED profile with adjustable light beam orientation designed to bring your spaces to life with elegance and control.

Free Cut
Cuttable to any required length

Adjustable Beam
Adjust light beam orientation

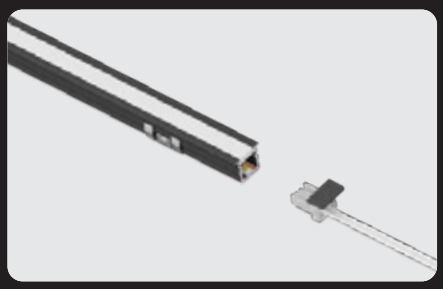

WDC Dual Colour
2700K to 400K in one profile

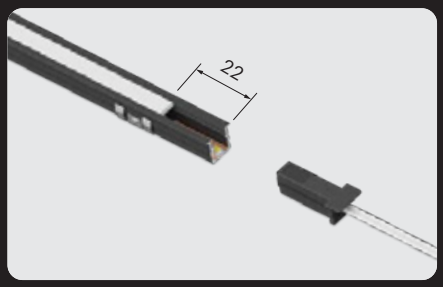

Plug & Play
Quick & easy installation with connectors

Multi Compatible
Works with switching systems & sensors

Designed for performance and flexibility

Moove 2 combines minimalist design with advanced lighting technology for a flawless lighting experience.

Features

FREE CUT
Cut to size in 5 MM increments for a perfect fit in any space.

ADJUSTABLE LIGHT BEAM ORIENTATION
Adjust the angle of the beam to highlight exactly where you need it.

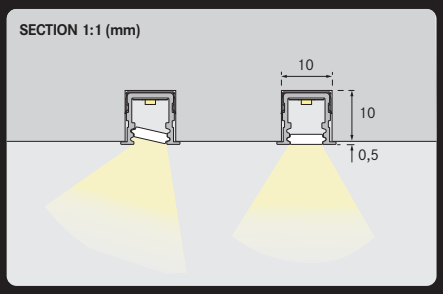

SLEEK AND DISCREET
Recessed design with integrated LED and diffucser for a seamless finish without visible LED dots.

EASY INSTALLATION
Plug and play power connectors and fixing clips for fast, secure installation.

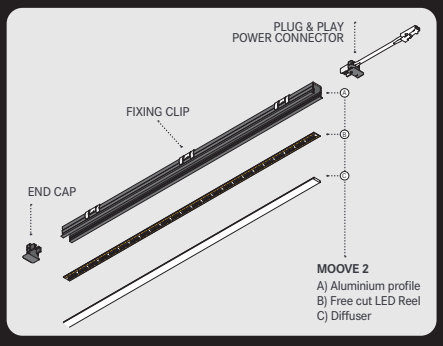

WIDE APPLICATIONS
Ideal for cabinets, shelves, wall units, wardrobes, and more.

Adjustable beam orientation

Tilt the light beam to direct light exactly where it's needed.

Complete Modular System

WDC Dual Colour

Colour temperature varies from 2700K to 4000K by reversing the insertion side of the power connector or the chosen optional switching system.

Perfect Lighting. Every Detail.

Vionaro V8.
The future of the drawer in eight millimetres.

Is it possible to develop a drawer that's as slim as a pencil? Yes, it is!

Until recently, the very idea of reducing a drawer side to 8 mm and making industrial production commercially viable would have been unthinkable. With Vionaro V8, this vision has now become reality.

VIONARO V8 ECHOES THE WORK OF AN EXPERIENCED ZEN MASTER. THE MINIMALIST DESIGN DRAWER SIDES SEEM TO EMBODY THE PURSUIT OF "NOTHINGNESS". THE NEW SLIM DRAWER SYSTEM EMPHASISES THE AIM OF GRASS TO CREATE BRAND QUALITY WITH MASTERLY PERFECTION IN THE SENSE OF THE ZEN TEACHINGS THAT ARE THOUSANDS OF YEARS OLD.

V8

DP

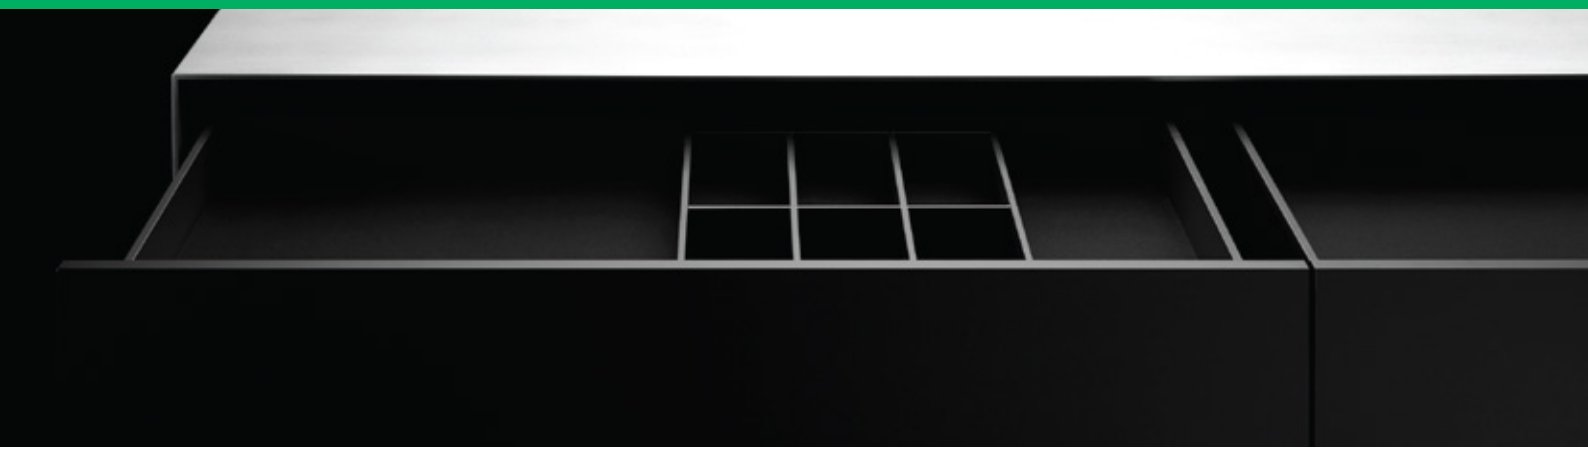

Underneath the Vionaro V8 drawer lies a slide system that has already been proven millions of times over: Dynapro ensures excellent running characteristics, precision movement and high stability. It ranks among the most successful concealed slides worldwide.

“Perfection is achieved, not when there is nothing more to add, but when there is nothing left to take away.”

Antoine de Saint-Exupéry

Vionaro V8
Slim Drawer System

Vionaro V8 features an 8-millimetre, minimalist drawer design that dispenses with the superfluous. As well as a timeless aesthetic, V8 offers above all outstanding motion design, sustainably coated, novel surfaces, maximum storage space and minimum complexity of parts along with the resource-efficient use of materials.

The magic of simplicity.

By dispensing with the superfluous, Vionaro V8 gains a breathtaking simplicity. Its clear, monolithic form will outlast time and trends. In this respect, Vionaro V8 has everything a design classic should offer. In addition, V8 makes it possible for the first time to fit kitchen, bathroom, office and living room furniture with the same movement system. The new Slim Drawer System provides the connecting link between areas of the home.

Timeless elegance means there’s nothing left to take away.

With V8, the drawer accomplishes a kind of metamorphosis from functional component to design element inside the cabinet. No matter whether it’s with the 72 mm, 89 mm, 122 mm, 200 mm or 250 mm drawer side height, or the harmoniously proportioned glass drawer – the tranquil elegance of Vionaro V8 derives from a patented transmission of forces between back panel and furniture front that does away with the need for obtrusive grooves, frames or brackets.

The world’s only 8-millimetre one-piece steel drawer side with no plastic elements.

The new drawer system is entirely without plastic. The Slim Drawer System doesn’t merely offer the only 8-millimetre one-piece steel drawer side in the world – Vionaro V8 is also the first pure-metal drawer side. All parts are made of steel and joined using cutting-edge laser welding technology. That creates maximum stability plus longevity and ensures an almost 100 per cent recycling rate.

Is it possible to develop a drawer that's as slim as a pencil? Yes, it is!

V8 Vionaro V8
Slim Drawer System.

Everything. Except ordinary. Until recently, the very idea of reducing a drawer side to 8 millimetres and, above all, making industrial production commercially viable would have been unthinkable. With Vionaro V8, this vision has now been turned into reality. The new slim drawer system not only offers the only 8-millimetre one-piece steel drawer side in the world – Vionaro V8 is also the first pure-metal drawer side with no plastic elements. That produces maximum stability plus longevity and ensures an almost 100 per cent recycling rate.

Perforated design allows air to circulate
Anodised aluminium base will resist corrosion and maintain constant ventilation
Anodised aluminium is food safe
Does not react with food
Easy to clean surface
Extends shelf life of fresh produce by reducing condensation
Can also be used with Nova Pro One
Can be used with H90, H122 and H186 side heights
500 MM deep
Includes spacer block to clear hinges

DESCRIPTION	CODE

NOVAPRO SLIDE BASE MOUNT 70 KG 500 MM RIGHT	F101132334
TIPMATIC SOFT-CLOSE ACTIVATOR CLIP SET	F102132634

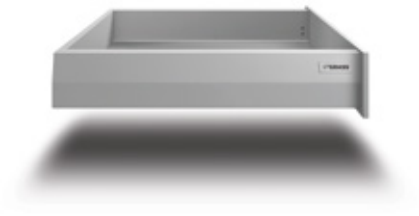

FEATURES:

Extends the options for flexible use and subdivision of cabinets, e.g. for waste separation systems
Assembly on the cabinet base or shelf
Synchronised full extension slide, 70 KG load capacity
Soft-close damping system
Excellent running characteristics
Compatible with Tipmatic Soft-close unit through additional activator
Suitable for all Nova Pro drawer sides

VINOWALL PINS WITH 50 MM SCREW - 150MM_BLACK	V_PINS100_BLK	100	BLACK

V-PINS: The V-Pins are used to hold the wine bottle in a cork facing direction. Maximum storage capacity gained from this method. Shared central pin. i.e 3 pins to hold 2 bottles.

The top of the pin supposed to be flat, with the point facing down, this allows the bottles to be spaced apart better and accommodate a wider variety of sizes.

Pins must fix through a board, not directly into the wall.

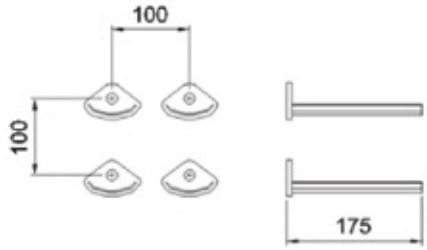

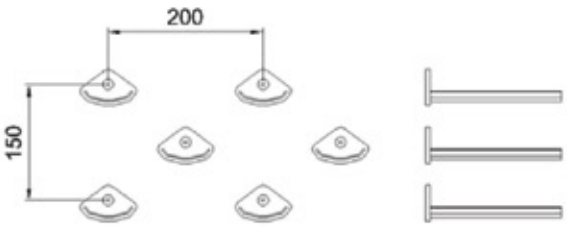

DESCRIPTION	CODE	SIZE	FINISH
SOLO WINE PIN_10	SOLO_PIN_BLK_10	73 MM X 175 MM	BLACK
SOLO WINE PIN_100	SOLO_PIN_BLK_100	73 MM X 175 MM	BLACK

SOLO PINS: The SOLO Pins hase been designed to create an impressive floating bottle effect without seeing any racking.

Each SOLO PIN holds 1 bottle and can be attached directly to your brick or concrete wall, timber panel or kitchen cupboards.

They can be placed tightly together for maximum storage capacity, or far apart for greater space in between each bottle.

ROUND WINE PINS:

The Round Pins are used to hold the wine bottle in a cork facing direction. Maximum storage capacity gained from this method.

Available in the 22 MM solid aluminium Round Pin
(shared central pin. i.e 3 pins to hold 2 bottles).
Also available in the thinner 12 MM solid Round Pin
(requires 2 pins for every bottle stored).

Pins must fix through a board, not directly into the wall.

PLANNING INFORMATION

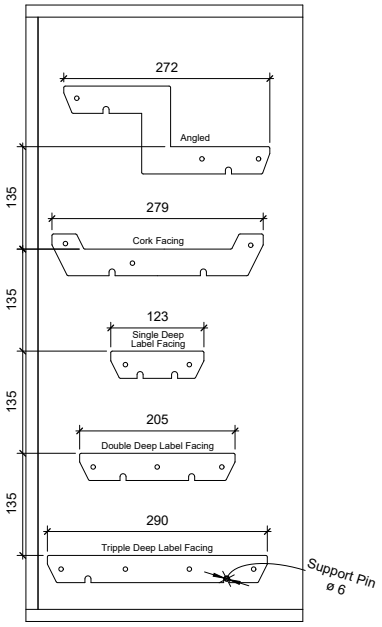

All dimensions in millimetres

V-Bar Wine Shelf System

Architectural-grade, powder-coated aluminium wine shelves designed to fit standard cabinetry. Supplied ready for installation with dowel fixings for fast installation and time-saving on site.

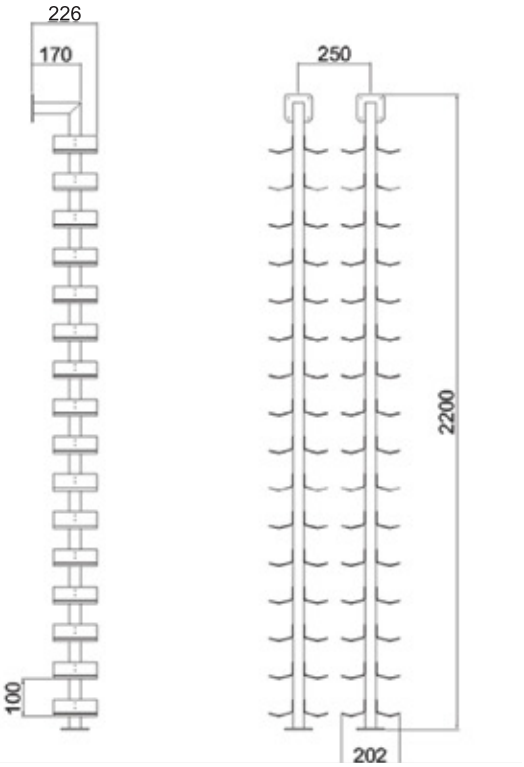

Available in Cork-Facing, Angled and Label-Facing configurations, the V-Bar system offers an easy way to upgrade a kitchen design into a refined wine display feature.

Standard finishes in stock; custom sizes (up to 1 M span) and colours available on request.

DESCRIPTION	CODE	SIZE	FINISH
DOUBLE SIDED WINE CRADLES 1800MM	DS_CRADLE_BLK_1800	32 BOTTLES	BLACK
DOUBLE SIDED WINE CRADLES 2000MM	DS_CRADLE_BLK_2000	36 BOTTLES	BLACK

DOUBLE SIDED WINE CRADLES 2400MM	DS_CRADLE_BLK_2400	44 BOTTLES	BLACK

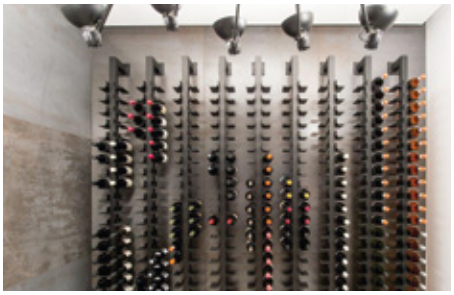

DOUBLE SIDED WINE CRADLE:

The Double Sided Wine Cradles have been a popular choice for a long time. Giving you great storage capacity for your available space. These units create a vertical storage look with floating bottles.

They are available as ‘floor to ceiling’ units, therefore making it possible to fit in front of glass panels or in the middle of a wine cellar.

They are also available as ‘floor to wall’ units, perfect for those awkward areas under the staircase where you need to follow the angle from low to high.

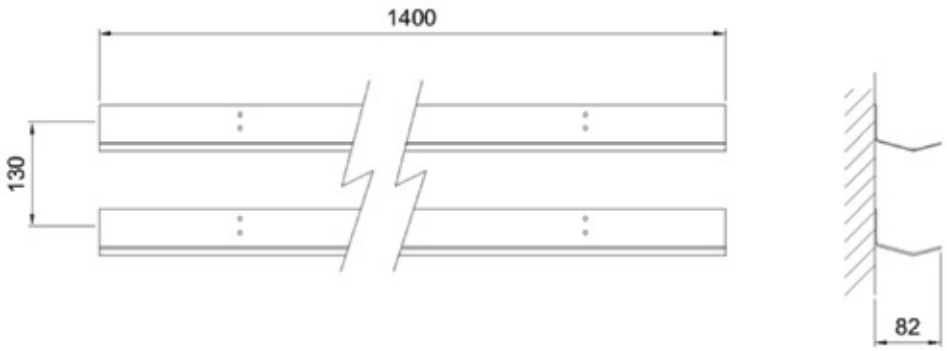

DESCRIPTION	CODE	SIZE	FINISH

HAWA SLIDE AND POCKET SYSTEM

The newly designed Hawa Concepta III family follows an innovative basic approach: Only making rooms visible when they are needed. Contemporary trends such as lack of urban living space and the associated demand for using living areas in an economical and multi-functional way have been anticipated perfectly in this way.

This is because the Hawa Concepta III and the Hawa Folding Concepta III make it possible to conjure up an office or an entire kitchen from virtually nothing, and make it disappear again. And they reveal themselves to be space economy experts by requiring very little room in the parked position.

Hawa
Sliding Solutions

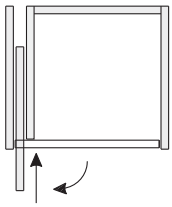

DESCRIPTION	CODE	SIZE (H)	COLOUR

The GRASS Group in numbers.

As a leading specialists in furniture movement design, we have a lasting influence on the furniture industry.

Three million kitchens are equipped with our movement systems every year.

We are at home around the globe: With over two hundred sales partners in 60 countries, GRASS is represented internationally.

WÜRTH

GRASS has been part of the international Würth Group since 2004 and operates independently under its own brand.

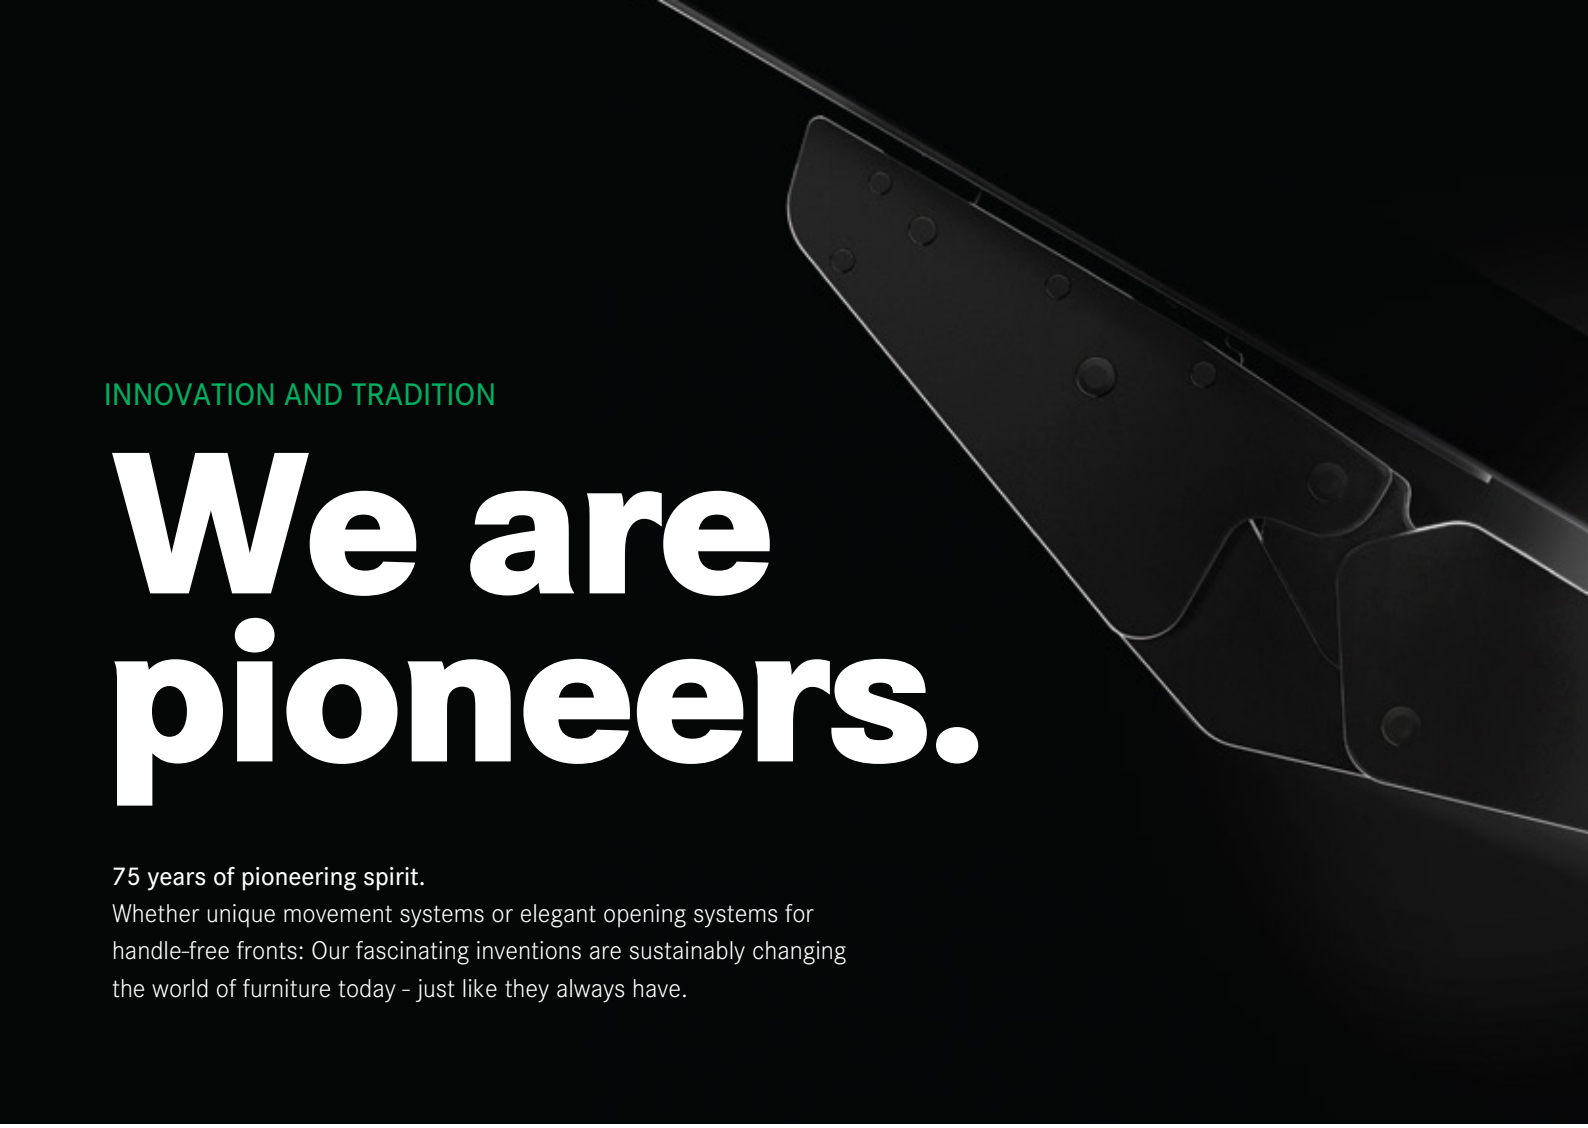

75 years of pioneering spirit.

GRASS has been a pioneer in the furniture industry now for more than 75 years.

1,642 employees

More than 1,600 employees work at seven production sites in Europe and America and eleven sales offices.

367 million euro sales.

INNOVATION AND TRADITION

We are pioneers.

75 years of pioneering spirit.
Whether unique movement systems or elegant opening systems for handle-free fronts: Our fascinating inventions are sustainably changing the world of furniture today – just like they always have.

INNOVATION AND TRADITION

GRASS has always been a pioneer in the furniture industry. From the first concealed hinge to the invention of the double-wall drawer, the history of GRASS has been shaped by visionary engineering expertise and countless groundbreaking products.
